INSTALLATION GUIDE

POLELED

INCREASE YOUR VISIBILITY

BASIC & EXTENDED

Installation guide

1 Place the cover and light unit over the pole

2 Banner: Place the fixture 20 inch beneath the counter weight of the banner
Flag: Place the fixture halfway up the pole

3 Clamp the unit with the bolts with hexagon tool nr. 4.
When inner diameter is too small, use included bolts from the outside to clamp the fixture

4 Drill a 0.4 inch hole under the unit

5 Place the tulle over the cable

6 Use a cable puller to pull the cable through the pole

7 Press the tulle tightly in the pole

8 Mount the cover on the light unit using the hexagon screws

BASIC & EXTENDED WIRING DIAGRAM

OPTION 1:

The fixture should be connected to ground at any time like the wiring diagram shows! If not, all warranty will expire

OPTION 2:

The fixture should be connected to ground at any time like the wiring diagram shows! If not, all warranty will expire

Use the option which fits the best in your installation.
When using another powersupply then recommend,
make sure the ground is **ALWAYS** connected!!!!
